Experience

Trustly

Jan. 2026 – Present

Software Engineer

- Engineered and maintained core Java B2B merchant billing and financial settlement pipelines processing multi-billion-dollar transaction volume (+\$100B), ensuring financial data integrity through automated reconciliation and robust batch execution.
- Designed mass financial reporting and automated reconciliation pipelines using Spring Batch and Quartz Scheduler, extracting and consolidating millions of daily transaction records.
- Engineered low-memory file streaming mechanisms (PDF, ZIP, CSV), integrating AWS S3, AWS Lambda, and automated secure SFTP delivery to partner financial institutions.
- Served as onboarding buddy and mentor for new hires, accelerating technical ramp-up across backoffice systems.

Alelo Brasil

May 2021 – Jan. 2026

Software Engineer

Mar. 2025 – Jan. 2026

- Scaled core card transaction processing and benefits microservices in Java/Kotlin (Spring Boot), implementing circuit breakers, distributed caching (Redis), and connection pooling to sustain 99.99% availability during month-end payday traffic spikes (+500M monthly requests, 10M+ users).
- Architected decoupled asynchronous pipelines using ActiveMQ and Spring Batch, refactoring synchronous bottlenecks to eliminate latency spikes during peak retail hours.
- Led technical code reviews and conducted zero-downtime database schema refactoring across high-volume Oracle and MongoDB databases.

Junior Software Engineer

Nov. 2022 – Mar. 2025

- Developed high-performance REST APIs in Java/Kotlin (Spring Boot) containerized on OpenShift (OCP4) with Azure DevOps CI/CD automation.
- Implemented authentication and authorization features (OAuth2, JWT, RBAC) and ensured code quality standards using Detekt, Spotless, SonarQube, and Veracode.
- Monitored service health and performance using Datadog, Kibana, and Dynatrace to sustain high operational reliability.

Software Engineering Intern

May 2021 – Nov. 2022

- Developed RESTful microservices for the MeuAlelo platform, improving legacy code maintainability and test coverage.
- Monitored application health, analyzed logs, and collaborated in an agile team (Nexus Scrum) to deliver customer-facing features.

Education

University of São Paulo – USP/Esalq

Oct. 2024 – Aug. 2026

Postgraduate Lato Sensu – MBA, Software Engineering (Completed)

- Program focused on advanced software engineering practices, including distributed systems architecture, microservices, Domain-Driven Design (DDD), design patterns, and scalable cloud systems.

São Paulo State University Júlio de Mesquita Filho – UNESP

August 2016 – January 2023

Bachelor's Degree in Electrical Engineering

- Comprehensive 5-year STEM foundation with emphasis on control systems, automation, signal processing, applied programming, algorithms, and mathematical modeling.

Projects

MockK (v1.14.0)

Open-Source Contribution

- Core unit testing and mocking library for Kotlin. Fixed state leak in verification mechanisms ensuring hermetic test isolation.
- Technologies: Kotlin, Testing Frameworks, Mocking Libraries

dotme

Creator & Maintainer

- Declarative dotfiles management CLI tool featuring atomic symlink reconciliation, pattern filtering, and syntax validation.
- Technologies: Shell / CLI, Git, Linux, Dev Productivity

Antifraud System

Personal Project

- High-throughput Spring Boot REST API for transaction risk validation with 4-tier RBAC role model, heuristic risk rules, and dynamic limit feedback.
- Technologies: Java, Spring Boot, Spring Security, REST API, Heuristics

Tools & Technologies

Languages & Core: Java, Kotlin, SQL, Bash

Frameworks & Ecosystem: Spring, Javalite, Google Guice

Databases & Caching: PostgreSQL, Oracle, MongoDB, Redis, MySQL

Cloud & DevOps: AWS (SQS, SNS, S3, Lambda), Docker, GitHub Actions, Azure DevOps, OpenShift

Observability & Quality: Datadog, Dynatrace, New Relic, Kibana, SonarQube, Veracode

Architecture & Concepts: Microservices, Distributed Systems, Batch Pipelines, Asynchronous Messaging, RBAC

Languages: Portuguese (Native), English (Intermediate-Advanced)
